

Resident Workshop: Energy-Based Devices

Saturday, October 10, 2026

Schweiger Dermatology Group | 4100 W 50th St | Edina, MN

Showcase Your Technology to the Next Generation of Dermatologic Leaders

Position your brand at the forefront of innovation by participating in this exclusive, hands-on workshop designed for dermatology residents. Hosted at Schweiger Dermatology Group with Co-Directors Brian Zelickson, MD and Eric Bernstein, MD, MSE, this immersive experience offers direct exposure to multiple energy-based treatment modalities through live, interactive chairside patient demonstrations. Residents rotate in small groups through eight distinct device stations, engaging closely with expert faculty and gaining invaluable clinical insights. This dynamic format not only highlights cutting-edge techniques but also provides device companies a high-impact platform to educate, influence, and build brand affinity with emerging dermatologic professionals.

American Society for Dermatologic Surgery

resident workshop energy-based devices
