

April 20 & 21, 2013 - New York, NY

AGENDA

Co-directors: Mathew M. Avram, MD, JD and Keyvan Nouri, MD

As a sponsor accredited by the ACCME, ASDS must ensure balance, independence, objectivity, and scientific rigor in all its educational activities. ASDS is committed to providing dermatologic surgeon learners with fair and balanced continuing medical education.

The purpose of this course is to familiarize participants with the latest advances in laser, Light sources and other devices and appropriate techniques for their use in patient care.

Course Learning Objectives:

Upon completion of this course, participants should be able to:

- Identify advances in devices and techniques
- Select appropriate devices and indications to recommend to patients
- Incorporate new techniques and regimens to add predictability and safety to procedures
- Discern and describe the differences, risks and benefits of various laser and device options
- Identify and address peri-procedure assessment and possible complications
- Demonstrate increased awareness of emerging and future technologies

ACGME/ABMS DESIRABLE PHYSICIAN ATTRIBUTES/COMPETENCIES:

The ASDS acknowledges the need for CME content to be designed within the context of desirable physician attributes as expressed by the ACGME/ABMS Core Competencies and the Dermatology Residency Committee. Aligned with Criterion # 6 of the Accreditation Council for Continuing Medical Education's Provider Requirements for CME, the ASDS has developed the content of this educational activity to address the ACGME/ABMS Core Competencies according to the following list:

Patient Care

That is compassionate, appropriate and effective for the treatment of health problems and the promotion of health.

Practice-based Learning and Improvement

That involves investigation and evaluation of their own patient care, appraisal and assimilation of scientific evidence and improvement in patient care.

Medical Knowledge

About established and evolving biomedical, clinical and cognate (e.g. epidemiological and social behavior) sciences and the application of this knowledge to patient care.

Interpersonal & Communication Skills

That result in effective information exchange and teaming with patients, their families and other health professionals.

Professionalism

As manifested through a commitment to carry out professional responsibilities, adherence to ethical principles and sensitivity to a diverse patient population.

Systems-based Practice

As manifested by actions that demonstrate an awareness of and responsiveness to the larger context and system for health care and the ability to effectively call on system resources to provide care that is optimal value.
